

Feasibility Study Services

A high-quality feasibility study is an important factor in order to obtain funds for project financing. Feasibility studies can convince investors or a bank that investing in the business is a wise choice, and this is one of the major goals of preparing a feasibility study.

Feasibility Study writing needs very specific skills and a clear understanding of the mind set of investors/financiers. This is a weakness for a company that offers Feasibility Study Services but is not active in the field of project financing and also not supported by banks and financial institutions.

This short explanation makes it clear why many of the projects are rejected by banks and financial institutions, although the documents seem supposedly complete and what is the reason for the success of some consulting firms in the preparation of financial documents.

Do you need help achieving your business goals?

**We can help you
transform your ideas
into reality.**

A 3D rendered image of a red dart with a silver tip and a red shaft, flying from the left and hitting a red and white target through a hole in a grey concrete wall. The wall is crumbling around the hole, and the dart is positioned as if it has just struck the target.

Pricing Policy

If the project qualifies, we can first receive 30% to 70% of the total cost, which is to be agreed upon with your company to prepare documentation, and the remaining amount when you receive the financing for your project. ▲

Regarding the total cost, we can agree on a price, or you can request an invoice from a qualified consulting firm to prepare the documentation, and we can provide a significant discount of 20% to 50% of the total cost of the invoice issued by the consulting firm. ▲

The Department Manager of Feasibility Studies Services is our Senior Vice President Dr. Farzad Kaj. Please view the honorary PhD's he has received:

- Ed Barton University, PhD of Corporate Banking/Law & Financing.
- Imperial College, London PhD of Developing Economies.
